APPLICATION PACKET TIPS

- 1 It is highly recommended that you go to the pageant's Web site www.kcfair.org/pageant and save the application to a computer so that you can type in your answers. The judges will notice if you do not type it. They will only see the information on the official application, so please do not add any extra pages.
- 2 Be sure that everything on your application is true and you are comfortable talking about it. Do not add things just because you think it sounds better. More than likely most of the personal interview questions will come from your application and if you are not familiar with what is on your application it will show.
- 3 Make a copy of your application so you can study it and others can help prepare you by asking you questions from it.
